

Three Sisters Wildlife Rubbing Trail

Are you ready for an Adventure?

Follow me, Professor Morass, around the wildlife rubbing trail to discover the wonderful wildlife that the three sisters has to offer. There are 10 to find so grab your pencils and lets go! Can you find them all?

The Wildlife Rubbings Trail

I waddle at my own pace but when I fly I like to go fast!
I am a

I am a carnivorous Bird. My Favourite foods are fish, frogs and small mammals.
I am a

The Wildlife Rubbings Trail

I have become extinct in many parts of the UK. However, I have a stronghold at the Three Sisters because of the wet woodland.

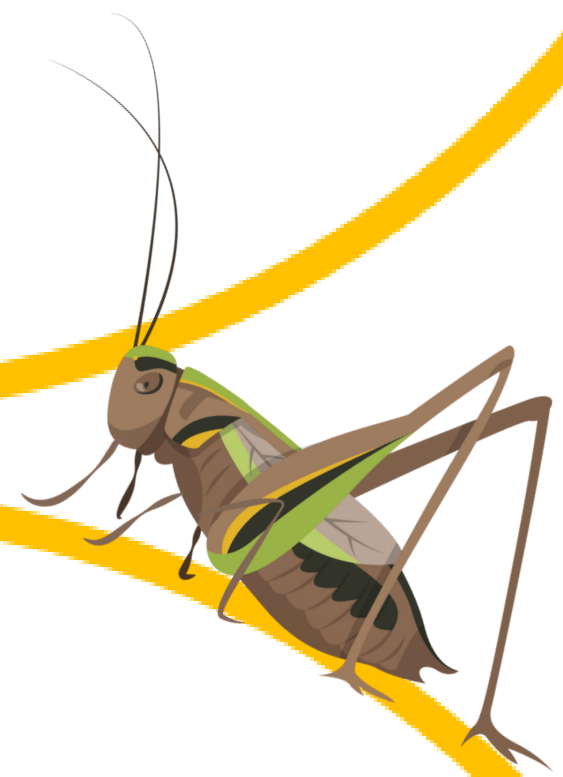

I am a

.....

I have very large eyes, so big that there is almost no room for eye muscles. But that's okay as I can turn my head almost 270 degrees.

I am a

.....

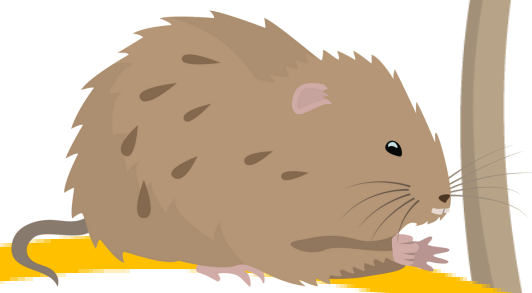

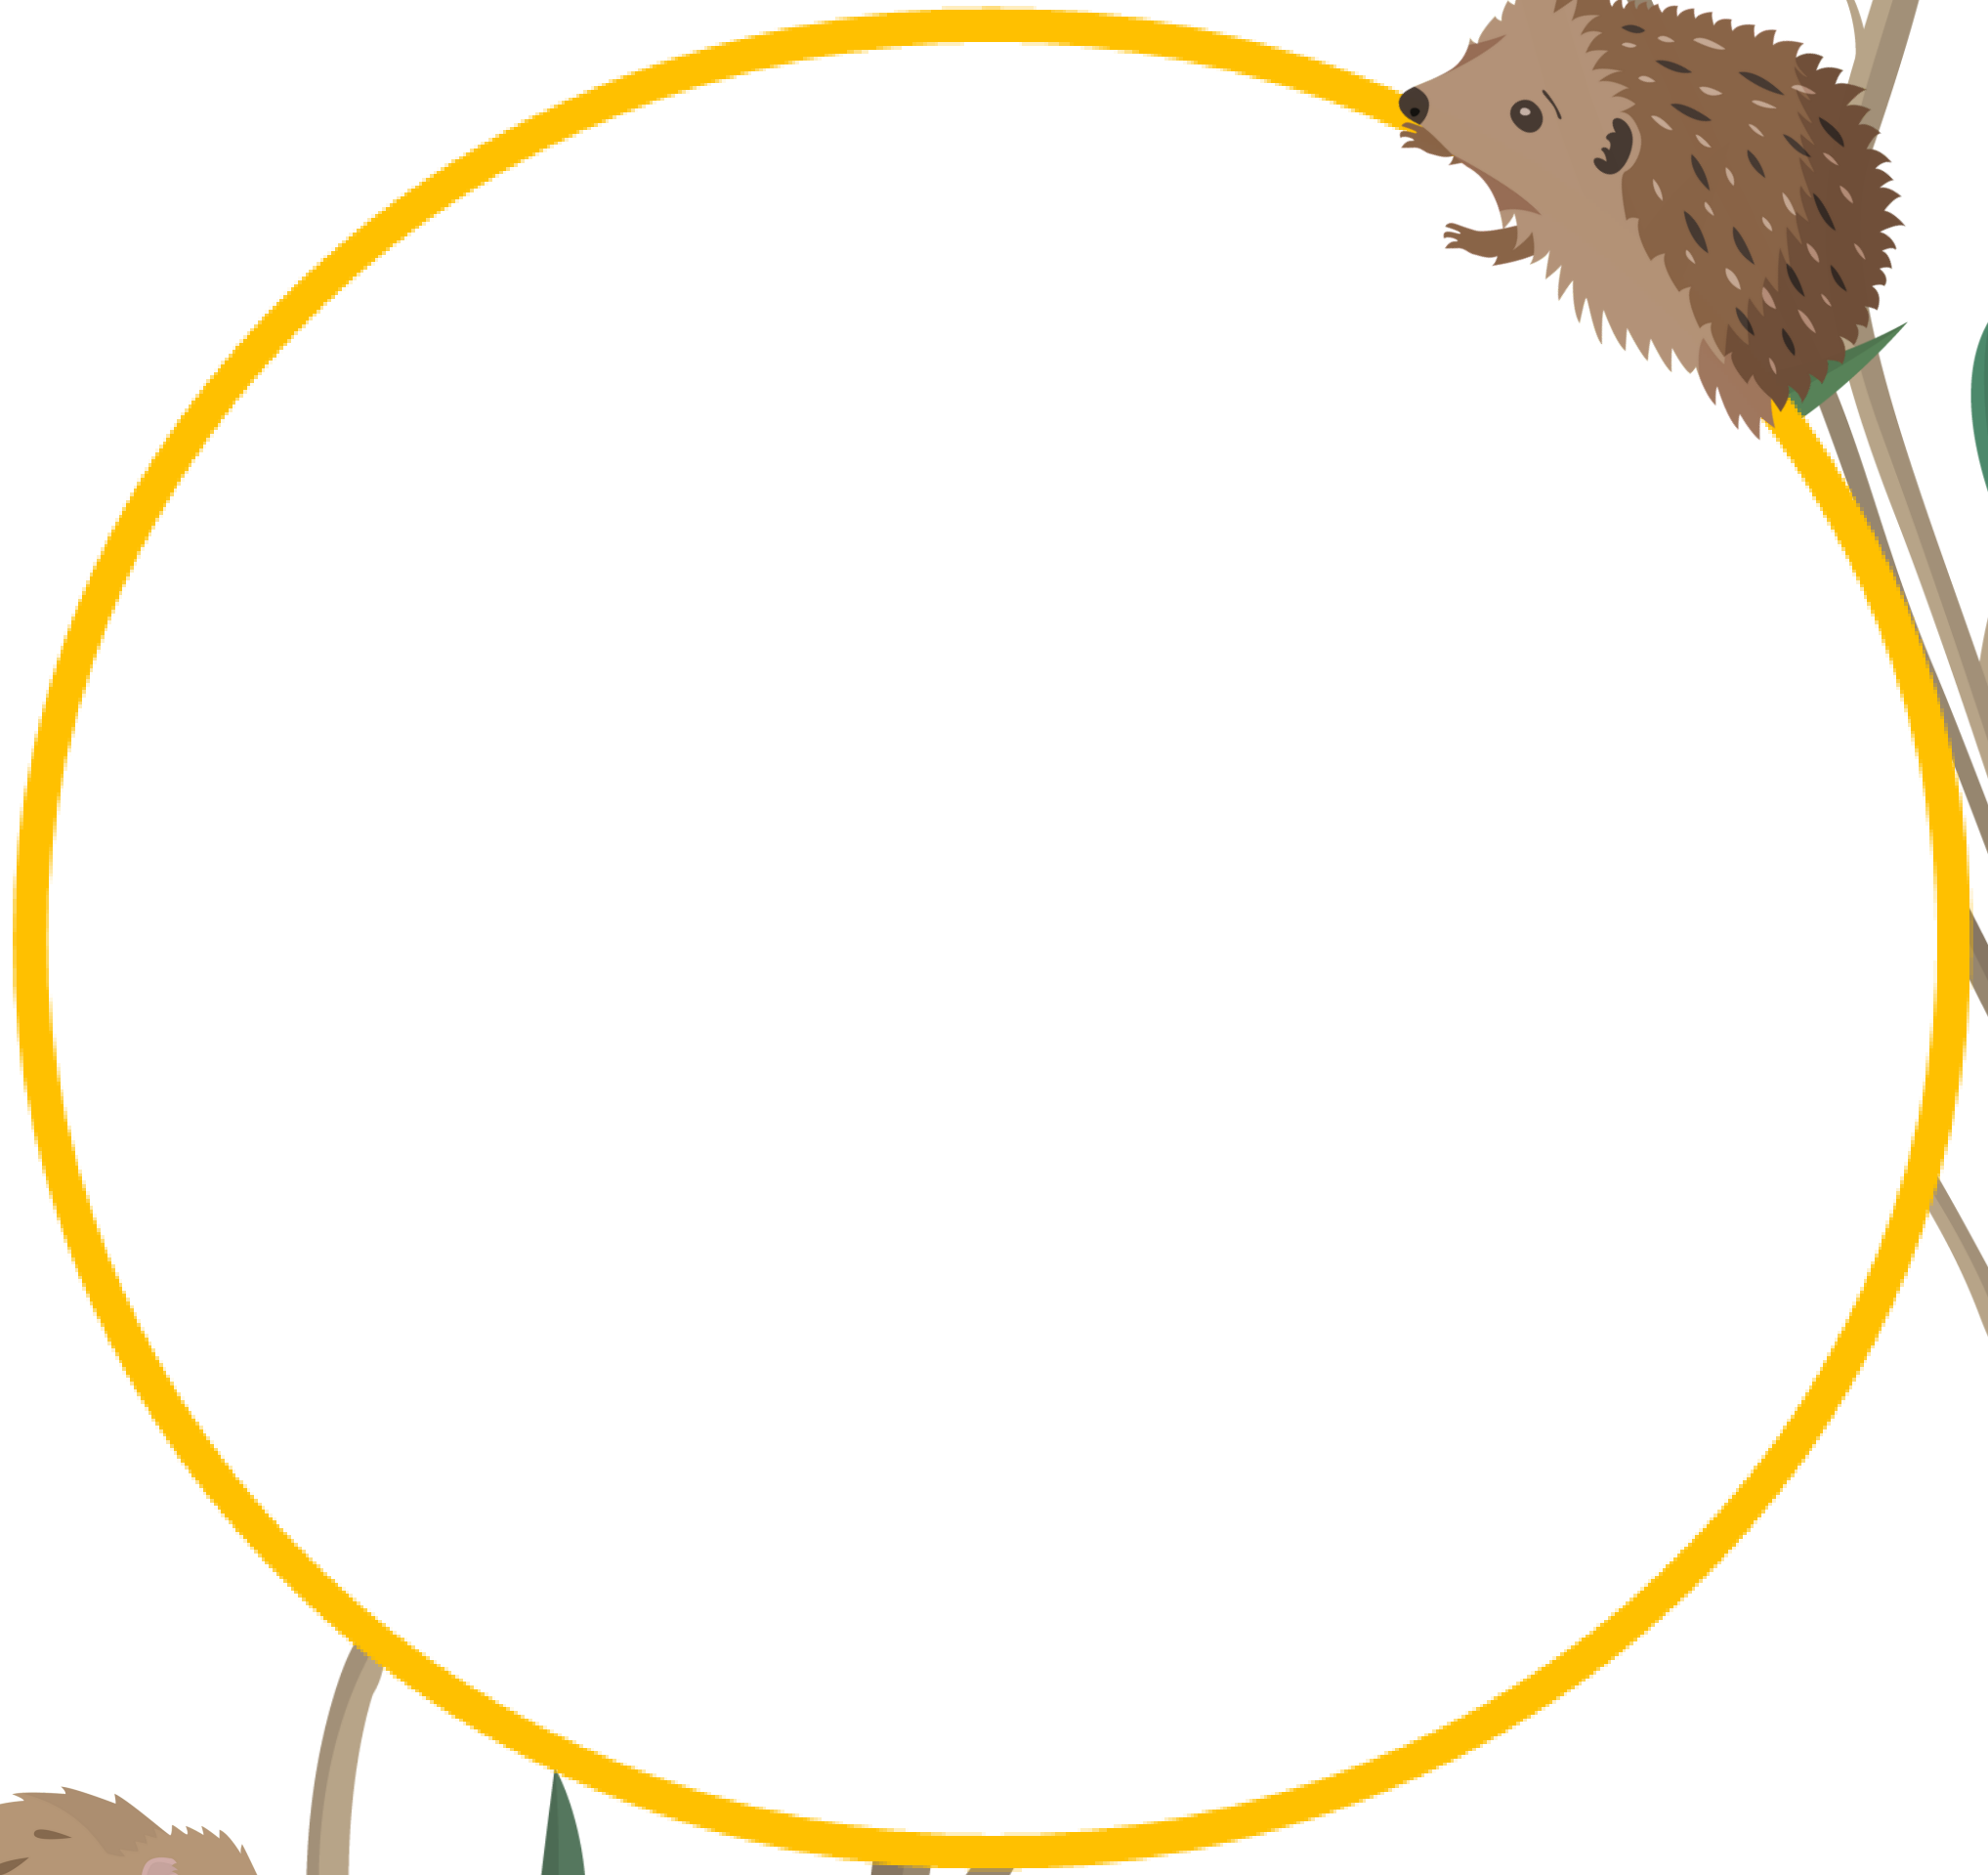

The Wildlife Rubbings Trail

I like to cling on to
the trees and use
my very strong
beak
to make holes in
the bark.

I am a

.....

I can absorb
water through
my skin so I
don't need to
drink.

I am a

.....

The Wildlife Rubbings Trail

At the time coal was forming, 315 million years ago, my wingspan was 1 meter wide. These days I am smaller insect that loves wetlands.

I am a

.....

Despite my name I also live on grasslands, sand dunes, moorlands, in gardens and houses.

I am the most common mammal in Britain.

I am a

.....

The Wildlife Rubbings Trail

I am so small that I
can fit in a
matchbox.

However, that does
not stop me from
eating 3000 insects
each night.

I am a

.....

I am the biggest
mammal at Three
Sisters. I have a
white rump and
no tail.

I am a
